

# KnotWax

More Performance!

More Protection!

More Pleasure!

## What is Knot Wax?

First and foremost it's NOT a wax!

Wax is an obsolete technology on par with castor oil remedies and sawdust and your transmission. Wax melts, wears off, thins out, trades and you need to reapply it... Often.

KnotWax speeds cleanup by preventing oil, dirt, engine soot, TKS fluid, etc from adhering to the aircraft. KnotWax is a totally new technology coating of flexible glass. Yes, GLASS!

Only 5 microns thick. KnotWax bonds at the molecular level eliminating corrosion and providing almost perfect UV protection.

## Why Knot Wax My Plane?

### Protection

Nothing sticks to KnotWax. KnotWax fights UV damage and keeps your finish safe.

### Performance

KnotWax will give you more Knots. KnotWax bonds at the molecular level and keeps dirt, soot, bugs, etc. from sticking to your plane there by improving your laminarity and increasing speed.

### Pleasure

Washing a KnotWaxed aircraft is fast and fun. Just a light soap wash and you're done!
